

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

GEOGRAPHICAL LIST TO R. F. HARPER'S "ASSYRIAN AND BABYLONIAN LETTERS," VOLS. I-VIII.

BY O. A. TOFFTEEN,
The University of Chicago.

The following list of references was prepared for my *Geography of the Cuneiform Inscriptions*, which will be published this summer.

The references are complete with the exception of a few mutilated names, of which only a few restorations have been made.

The importance of the letter literature for Assyrian and Babylonian geography can hardly be overestimated. Quite frequently these letters furnish us the correct reading of names, incorrectly or ideographically written in the historical inscriptions. More often exact identifications of the localities are possible by means of these letters—this applies especially to the cities of Zamua and southern Nairi, the Kaširi district, and the cities of Assyria itself. The inscriptional Kaldea is no longer the equivalent of Babylonia or Karduniaš, but is, with all its *bitāti*, only a narrow strip of land on the border of ^{nat} Marratim.

Several new geographical names, especially in Urartu and Manna, are offered us in the Letters.

The existence of the land of Kūsi, the old kingdom of Kašši of the Amarna letters, located in Mesopotamia on the lower Balix, is placed beyond doubt by these letters, and is perhaps the most important fact, from a historical point of view, for those who are interested in the history of Ancient Assyria and Mesopotamia, especially in the Amarna period.

Further comment on these names must at present be reserved for my forthcoming work.
